SR TECH ENGINEERING PVT LTD.

SR Tech Engineering Pvt Ltd is an **engineering** and **EPC service company** delivering reliable, safe, and efficient solutions for Boiler, Power Plant and **Balance of Plant (BOP)** projects.

Established in 2013, we have successfully executed nearly **55 projects** across different locations in India, building strong expertise in high-pressure and low-pressure boiler erection, fabrication, piping, structural works, and plant equipment installation.

Our comprehensive capabilities include **Boiler Erection, ESP Erection, Turbine Erection, MS Structure Works, IBR & Non-IBR Pipeline Erection, MS & SS Tank Fabrication, Thermic Fluid Heater Erection, Insulation Works, Chimney Fabrication, Material Handling Systems, and skilled manpower deployment.**

Backed by a team of experienced engineers, supervisors, technicians, and skilled manpower, we focus on delivering every project with precision, safety, quality, and timely execution. Our site teams work in close coordination with clients and project stakeholders to ensure seamless execution from fabrication to final erection and commissioning support.

With years of field experience and a strong understanding of industrial project requirements, SR Tech Engineering Pvt Ltd is committed to turning engineering requirements into safe, dependable, and **high-quality project execution.**

Quality

At SR Tech Engineering Pvt Ltd, **quality** and **safety** are at the core of every project we undertake. Our experienced engineers, supervisors, technicians, and skilled workforce work in close coordination to deliver reliable services with precision, consistency, and strict adherence to safety standards.

We are committed to achieving complete customer satisfaction through quality workmanship, disciplined execution, technical expertise, and timely project delivery.

Our technical capabilities are further strengthened by a Special Class 'I' IBR License, authorizing work up to a working pressure of 125 kg/cm².

Quality in Execution. Safety in Every Step. Excellence in Every Project.

Product & Services

We provide complete engineering solutions under one roof

BOILER ERECTION & MAINTENANCE

We undertake complete boiler erection and maintenance services for high-pressure and low-pressure boiler systems. Our experienced site teams ensure precise installation, safe execution, and reliable performance while maintaining strict adherence to project specifications and safety practices.

AIR POLLUTION CONTROL EQUIPMENT

We provide fabrication and erection services for Air Pollution Control Equipment, including Bag Filters, Electrostatic Precipitators (ESP), and Wet Scrubbers. Our execution capabilities cover equipment installation, structural integration, duct connections, and associated site works for efficient and dependable plant operation.

INDUSTRIAL PIPING & DUCTING

Our expertise includes industrial piping and ducting fabrication and erection for process and utility applications. From fabrication to site installation, our teams focus on dimensional accuracy, proper alignment, quality workmanship, and safe execution for reliable plant connectivity and operation.

M.S. & S.S. CHIMNEY FABRICATION & ERECTION

We undertake M.S. and S.S. chimney fabrication and erection with a focus on structural integrity, accurate fabrication, proper alignment, and safe site installation. Our experienced manpower ensures efficient execution of chimney projects as per project requirements and engineering specifications.

Product & Services

We provide complete engineering solutions under one roof

REFRACTORY WORK & FABRICATION

We provide refractory work and associated fabrication services for industrial boilers and process equipment. Our skilled teams execute refractory applications with attention to proper preparation, installation, finishing, and workmanship to support equipment durability and thermal performance.

SHUTDOWN & MAINTENANCE SERVICES

Our shutdown and maintenance services are designed to support critical plant maintenance during planned outages. With experienced engineers, supervisors, and skilled technicians, we undertake repair, replacement, inspection, and associated maintenance activities with a strong focus on safe, systematic, and timely execution.

BOILER ACCESSORIES & HEAVY STRUCTURE WORK

We undertake the fabrication and erection of boiler accessories and heavy structural components, including Superheater Coils, Economiser Coils, Boiler Bank Tubes, and Heavy Structures. Our experienced fabrication and erection teams ensure accurate assembly, proper alignment, and dependable site execution.

INSULATION WORK

We provide industrial insulation services for boilers, piping, ducting, equipment, and associated plant systems. Our workmanship focuses on proper installation and finishing to support thermal efficiency, equipment protection, and safer operating environments.
